DETAILED ACTION

Non-Final Rejection 2

Claim Rejections - 35 USC \$ 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-2, 4-5, 7-8, 13, 16-17, 26, 32, are rejected under 35 U.S.C. 102(b) as being unpatentable over Clive-Smith (6,109,469).

Regarding claims 1-2, 4-5, 7-8, 13, 16-17, 26, 32, Clive-Smith (6,109,469)
discloses the invention as claimed to include a floor 18; a front wall 15; spaced side walls 8; a cargo storage space Fig 1 with a roof; at least one corrugated sheet having alternating ridges 12 and grooves 17; mechanical fasteners 17; a top rail 4; a bottom rail 5 and an external panel 6.

Claim Rejections - 35 USC \$ 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 3, 18-19, 28, 30, 31, are rejected under 35 U.S.C. 103(a) as being unpatentable over Clive-Smith (6,109,469) and in view of ordinary skill in the art.

Regarding claims 3, 18-19, 28, 30, 31 Clive-Smith (6,109,469) as applied to claim 1 discloses the invention as claimed.

However, Clive-Smith (6,109,469) does not disclose a corrugated sheet comprises steel with thickness between 0.25 to 1.5 inches; combination with a powered towing component is releasably connectable to the cargo container; wheeled carriage beneath the floor.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a corrugated sheet which comprises steel with thickness between 0.25 to 1.5 inches; combination with a powered towing component is releasably connectable to the cargo container; and wheeled carriage

new material.

beneath the floor, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use to optimize the cost of the product made in light of size, availability, capacity to manufacture, manufacturing technology, transportability, optimize the number of parts, safety and other considerations and still meet the design specifications. Higher level of cost efficiency can be achieved by identifying the required material from materials known/available in the open market place than to develop

Conclusion

3. Any inquiry concerning this communication or earlier communications should be directed to Primary Examiner Kiran B. Patel whose telephone number is 571-272-6665. The examiner can normally be reached on M-F from 8:00 to 5:00. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
